

Bradford June 1st 1879

Dear Father

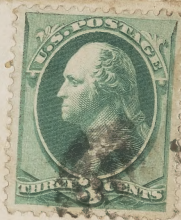

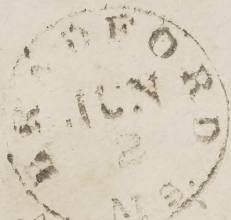

Mother told me that you wished me to write you letter about the garden I have planted some dwarf peas, summer squashes, cucumbers, early rose potatoes, yellow eyes, horticultural and six weeks beans, sweet corn, beets and lettuce, and have set out some tomato plants. Everything is up but the six weeks beans, beets and lettuce. We have the upper half of the garden. I have but four rabbits now but my two she ones are to have some young ones the 27th of June. Charlie Watter keeps his rabbit in the barn he has eight.

It has been very hot here
they said yesterday it was up
to 102 in the shade and it is
as hot today. I am getting a
collection of birds eggs I have
so far 42 or 43 different kinds.
I hope you will gain strength
enough to come home soon. I
cannot write any more now
as it is so hot so good bye
from

your son

Frank Mather

P. S. What shall I do with the
hay.

Mr. Frank N. Worther.
Sterling Rice County
Kansas.
